

Fewer workers on the line. 200% tax relief on the equipment. Payback in under two years.

产线少用人，设备享 200% 税务减免，两年内回本。

We design, supply, install and service automated production, welding, warehouse and power-distribution systems — engineered by a Shenzhen-listed equipment group, delivered and maintained by a Malaysian team.

我们提供自动化产线、焊装、仓储与配电系统的方案设计、供货、安装与售后：设备来自深交所上市的智能装备集团，交付与维护由本地团队负责。

【待填：我方公司名称】 Authorised partner of Sanfeng Intelligent (SZSE: 300276) 2026

01 Three costs that are rising whether you automate or not

不论你是否自动化，这三项成本都在上升

LABOUR COST

RM 1,850

**per foreign worker,
per year — levy alone**

The Multi-Tiered Levy Mechanism takes full effect in 2026: companies that keep relying on foreign labour pay more, companies that invest in automation pay less.

西马制造业外劳人头税约 RM 1,850/人/年。多层次征费机制 2026 年全面实施——继续依赖外劳的企业成本更高，投资自动化的企业征费更低。

HEADCOUNT POLICY

15% → 10%

**foreign workers as a share
of the workforce, by 2030**

Under the 13th Malaysia Plan the government is pushing companies toward automation rather than cheaper labour. Quotas get tighter every year.

第十三大马计划目标：2030 年前把外劳占劳动力比例从约 15% 降到 10%，并推动企业转向自动化。配额只会越来越紧。

FLOOR SPACE

**Industrial land and
rent keep climbing**

When you cannot expand sideways, you expand upward — high-bay racking with stacker cranes or four-way shuttles stores 3–5× more in the same footprint.

厂房与地价持续上涨。横向扩不了，就要向上要空间——高位货架配堆垛机或四向穿梭车，同样占地可多存 3–5 倍。

And one that is falling: the cost of automating. Automation Capital Allowance gives **200% capital allowance on the first RM 10 million** of qualifying automation spending (YA 2023–2027), subject to MIDA approval and SIRIM verification.

同时有一项成本在下降：自动化本身。自动化资本减免（Automation CA）对首 1,000 万令吉合格自动化支出给予 200% 资本减免（2023–2027 课税年度），须经 MIDA 批准与 SIRIM 技术核验。

02 Who you are buying from

你的供应商是谁

Two companies, one contract. You sign one local contract, in Ringgit, with a Malaysian entity that is responsible for the whole job — including the parts that go wrong.

两家公司，一份合同。你只与一家马来西亚本地实体签订令吉合同，由它对整个项目负责——包括出问题的时候。

YOUR CONTRACT PARTY

【待填：我方公司名称】

Malaysian company. Responsible for engineering, importation and customs, installation, commissioning, acceptance, training, spare parts and after-sales response — plus preparing your Automation CA application.

马来西亚本地公司。负责方案工程、进口清关、安装、调试、验收、培训、备件与售后响应，并代办自动化资本减免申报。

【待填：成立年份、团队规模、既有业绩、数字化转型博士团队介绍】

EQUIPMENT MAKER

Sanfeng Intelligent Equipment Group · 三丰智能

Listed on the Shenzhen Stock Exchange since 2011 (code 300276). Over 1,600 staff including 51 senior engineers and 16 professor-level senior engineers; more than 400 granted patents, over 60 of them invention patents. R&D and manufacturing bases in Shanghai, Wuhan and Huangshi.

2011 年深交所上市（300276）。员工 1,600 余人，含高级工程师 51 人、教授级高工 16 人；授权专利 400 余项，其中发明专利 60 余项。上海、武汉、黄石三地研发制造基地。

Seven specialist subsidiaries cover conveying and assembly lines, automotive welding lines, warehouse automation, AGV/AMR, robot workstations, and high- and low-voltage switchgear — which is why one supplier can handle a paint-shop conveyor, a case-shuttle warehouse and a substation for the same site.

七家专业子公司分别覆盖输送与总装线、汽车焊装线、仓储自动化、AGV/AMR、机器人工作站、高低压成套设备——因此同一个工地的涂装输送线、料箱库和配电房可以由同一家供应商完成。

03 Four solution packages

四类标准化方案

MANUFACTURING · FURNITURE, ALUMINIUM, FOOD, GLOVES, HARDWARE

Line automation for established factories

传统制造：产线自动化

The fastest project to justify. A single robot cell or a conveying line removes the most labour-intensive, most injury-prone stations without stopping the rest of the plant.

最容易立项的一类。一个机器人工作站或一条输送线，就能替掉最耗人力、工伤风险最高的工位，且不必停掉整厂生产。

- Palletising / de-palletising robots, grinding, gluing, spray-painting and welding cells
拆码垛、打磨、涂胶、喷漆、焊接机器人工作站
- Standard conveying lines: footwear, aluminium profile, timber roller, small appliance
标准输送线：制鞋、铝型材、木材辊道、小家电
- Typical contract RM 300k – RM 3m · delivery 3–6 months
典型合同 RM 30 万-300 万，交期 3-6 个月

Aluminium profile line 铝型材输送线

Palletising robot 码垛机器人

Gluing robot 涂胶机器人

Footwear line 制鞋生产线

Store more in the same footprint — and power it

仓储与数据中心：向上要空间，并解决供电

High-bay automated storage plus the electrical infrastructure to run it. Malaysia's data-centre build-out has made switchgear and compact substations a repeat-order business, not a one-off.

高位自动化仓储，加上支撑它的电气基础设施。马来西亚数据中心的建设浪潮，让成套开关设备与预装式变电站成为可复购的常规业务，而非一次性项目。

- Stacker cranes, four-way shuttles, RGV, elevators, conveyors, automatic truck loading
堆垛机、四向穿梭车、有轨穿梭车、提升机、输送机、自动装车系统
- WMS software and system integration with your existing ERP
WMS 仓储管理系统与既有 ERP 的系统集成
- HV/LV switchgear, YBW compact substations, PLC and PV distribution cabinets
高低压开关柜、YBW 预装式变电站、PLC 柜与光伏配电柜

Stacker crane 堆垛机

Four-way shuttle 四向穿梭车

Auto loading 自动装车

Compact substation 预装式变电站

Move material without stopping production

E&E / 半导体：不停产的车间物流

AMRs and case-handling systems are the easiest automation to approve in an electronics plant: modest budget, no line shutdown, measurable within a quarter.

在电子厂里，AMR 与料箱搬运系统是最容易获批的自动化：预算可控、无需停线、一个季度内即可看到效果。

- AMR fleets for inter-process transfer and cleanroom-adjacent material flow
工序间转运与洁净区周边物流的 AMR 机群
- Case-type four-way shuttle buffer stores for WIP
在制品缓存：料箱式四向穿梭车库
- PCB transfer, cell feeding and machine-tending robot cells
PCB 转线、电芯上料与机床上下料机器人工作站

AMR 智能搬运机器人

Case shuttle 料箱四向穿梭车

PCB transfer 转线机器人

Cell feeding 电芯上料

Body shop, final assembly and battery pack

汽车与新能源：焊装、总装与电池 PACK

The group's original business: flexible body-in-white welding lines, overhead and floor conveying for trim and final, and battery pack assembly for EV programmes.

集团起家的主业：白车身柔性焊装线、内饰与总装的空中与地面输送系统，以及新能源电池 PACK 装配线。

- Flexible framer, geo pallets, small pallets, roller hemming, laser welding
柔性总拼线、随行夹具、滚边机器人、激光焊
- EMS monorail, power & free chain, skid, skilnet and slat conveying for trim/final
EMS 自行小车、积放链、滑撬、滑板、板链输送
- Battery pack lines and chassis / battery lifting assembly AGVs
电池 PACK 线与底盘/电池举升装配 AGV

Flexible framer 柔性总拼线

Roller hemming 滚边机器人

Battery PACK 电池线

Chassis AGV 底盘举升

04

What it is worth on your line

在你的产线上值多少钱

Change the numbers to match your plant. Everything is calculated live — nothing is hidden.

Your inputs

输入你的数据

Workers the line replaces 该产线可替代的工人数

12

Of which foreign workers 其中外劳人数

8

Fully loaded cost per worker 单个工人的综合月成本 (RM/月)

2200

Wages, overtime, EPF and SOCSO 含工资、加班、EPF 与 SOCSO

Annual output value of the line 该产线年产值 (RM)

20000000

Scrap & rework reduction 不良与返工降低比例 (%)

1.5

Equipment investment 设备投资额 (RM)

1300000

Corporate tax rate 企业所得税率 (%)

24

☒ Apply Automation CA (200% on first RM 10m)
计入自动化资本减免 (首 1,000 万令吉 200%)

SIMPLE PAYBACK 静态回收期

1.5 years 年

Effective investment RM 988,000 ÷ annual benefit RM 643,600

Where the money comes from

收益来自哪里

Wages 工资		RM 316,800
Foreign worker levy 外劳征费		RM 14,800
Recruitment & housing 招募与宿舍		RM 12,000
Scrap & rework 不良与返工		RM 300,000

Annual benefit 年化收益合计	RM 643,600
Equipment investment 设备投资额	RM 1,300,000
Automation CA tax shield 自动化资本减免带来的税盾	- RM 312,000
Effective investment 有效投资额	RM 988,000
5-year net benefit 五年净收益	RM 2,230,000

Automation CA is not automatic: the applicant must be incorporated and tax-resident in Malaysia, have carried on manufacturing or services activity for at least 36 months, obtain MIDA approval in advance and pass SIRIM technical verification. Figures here are an estimate for discussion, not a tax opinion. 自动化资本减免并非自动享有：申请公司须在马来西亚注册并为税务居民、从事制造或服务业务满 36 个月、事先取得 MIDA 批准并通过 SIRIM 技术核验。本页测算仅供讨论，不构成税务意见。

05 The grants and allowances — we prepare them

补贴与税务减免，由我们代办

Most factories never claim what they are entitled to, because the paperwork sits with a finance team that is already busy. We prepare the technical documentation as part of the project.

多数工厂拿不到本该属于自己的补贴，因为申报材料压在本就繁忙的财务团队手里。我们把技术材料的准备作为项目的一部分。

PROGRAMME 项目	WHAT YOU GET 内容	KEY CONDITIONS 关键条件
Automation Capital Allowance 自动化资本减免	200% capital allowance on the first RM 10 million of qualifying automation expenditure, YA 2023–2027 首 1,000 万令吉合格自动化支出享 200% 资本减免 (2023–2027 课税年度)	Applications to MIDA between 1 Jan 2023 and 31 Dec 2027; prior MIDA approval; SIRIM technical verification; ≥36 months of operations; at least one qualifying item with Industry 4.0 elements 2023-01-01 至 2027-12-31 期间向 MIDA 申请；需事先获批并经 SIRIM 核验；经营满 36 个月；至少一项合格设备含工业 4.0 要素
Budget 2026 Accelerated CA 2026 预算案加速资本减免	20% initial and 40% annual allowance on approved plant, machinery, ICT systems and licensed software 对已批准的厂房、机器、ICT 系统与授权软件给予 20% 初始 + 40% 年度扣除	Investment made between 11 Oct 2025 and 31 Dec 2026 投资发生在 2025-10-11 至 2026-12-31 期间
NIMP 2030 Intervention Fund NIMP 2030 干预基金	Financial assistance for SMEs adopting Industry 4.0 technologies, under the plan's goal of transforming 3,000 smart factories by 2030 支持中小企业采用工业 4.0 技术；蓝图目标为 2030 年前改造 3,000 家智能工厂	Per the programme's published criteria 以官方公布的适用条件为准
HRD Corp 人力资源发展基金	Claimable operator and maintenance training delivered as part of commissioning 调试阶段的操作与维护培训可申请报销	Registered employer; approved training scheme 须为注册雇主并使用获批培训计划

06 How we deliver, and what we commit to

我们怎么交付，承诺什么

STEP 1 Diagnostic 现场诊断 2-3 days on site. Line balance, material flow, headcount and bottleneck mapping by our digital transformation team. 现场 2-3 天，节拍、物流、人力与瓶颈盘点。	STEP 2 Concept 概念方案 Layout, equipment list, throughput calculation and investment case within 30 days. 30 天内出布局、设备清单、产能测算与投资测算。	STEP 3 Quotation 报价 Fixed-price local contract in Ringgit, including duties, delivery and commissioning. 令吉固定价本地合同，含关税、运输与调试。	STEP 4 Build 制造与验厂 Factory acceptance test before shipment — you are invited to attend. 发运前工厂验收测试，欢迎到场。	STEP 5 Install 安装调试 Local installation crew, commissioning, operator training, site acceptance. 本地安装队伍、调试、操作培训与现场验收。	STEP 6 Service 运维 Warranty, local spare parts stock, preventive maintenance contract. 质保、本地备件库、预防性维护合约。
COMMITMENT Remote response in 4 hours Any production-stopping fault gets an engineer on a call within four working hours. 任何停产故障，4 个工作小时内有工程师接入远程支持。	COMMITMENT On site within 48 hours If it cannot be solved remotely, our engineer is at your plant within 48 hours. 远程无法解决的，48 小时内工程师到达现场。		COMMITMENT Spare parts held locally Wear parts and common electrical components stocked in Malaysia, not shipped from China per order. 易损件与常用电气件在马来西亚本地备货，不必每次从中国发货。		

Equipment is supplied to IEC standards for the Malaysian grid (415 V / 240 V, 50 Hz). Lifting and pressure equipment is presented for JKKP (DOSH) inspection; electrical installation work is carried out through CIDB-registered and Energy Commission-licensed contractors.

设备按马来西亚电网适用的 IEC 标准供货（415V/240V, 50Hz）；起重与压力设备提交 JKKP（DOSH）检验；电气安装工程由 CIDB 注册及能源委员会持牌承包商实施。

07 Compared with the alternatives

与其他选择相比

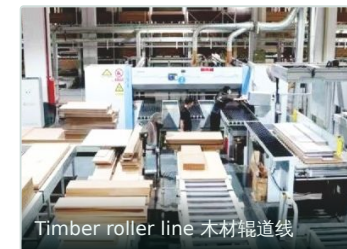

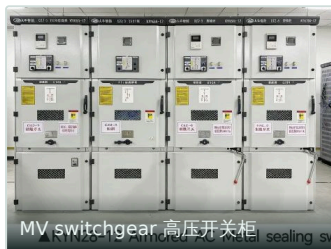

YOU COULD BUY FROM...	WHERE IT WORKS	WHERE IT HURTS
A Japanese or European integrator 日欧一线集成商	Proven, well documented, trusted by MNC headquarters 可靠、文档完整、跨国总部认可	Typically 40-100% higher price, longer lead time, slow response to scope changes 价格通常高 40-100%，交期长，变更响应慢
A trading agent for Chinese equipment 中国设备的贸易代理	Lowest headline price 报价最低	Sells boxes, not systems. No engineering, no commissioning responsibility, no one accountable at acceptance 卖的是设备不是系统。不做工程、不担调试责任、验收时没人负责
Buying direct from China 直接从中国采购	No middleman margin 没有中间加价	You carry importation, standards compliance, installation and every warranty claim across a 4,000 km service radius 清关、标准符合性、安装与所有质保索赔都由你承担，售后半径 4,000 公里
Us 我们	Listed-manufacturer equipment, one local Ringgit contract, local engineering and service, incentive applications prepared for you 上市厂商的设备、一份本地令吉合同、本地工程与售后、补贴代办	We are not the cheapest line item — we are the lowest total cost of ownership 我们不是单价最低的，而是总拥有成本最低的

08 Delivered systems

已交付系统

Reference projects executed by Sanfeng Intelligent in China. Client names are disclosed on request, subject to the manufacturer's authorisation and the end client's consent.

以下为三丰智能在中国已实施的参考项目。客户名称可应要求披露，需取得制造商授权与终端客户同意。

09 Start with a free diagnostic

从一次免费诊断开始

Two days on your floor. A concept and an investment case in 30 days.

在你的车间两天，30 天内交出概念方案与投资测算。

No obligation and no charge for the first assessment. You get a written report covering line balance, material flow, headcount impact, a proposed scope and an indicative budget — useful even if you decide to do nothing.

首次评估不收费、无附加条件。你会拿到一份书面报告：节拍与物流分析、人力影响、建议范围与投资区间——即使最后决定什么都不做，这份报告仍然有用。
